EXPERIENCE

• Software Developer, Brainstorm Force (CartFlows) August 2025 - Present

CartFlows is a WooCommerce-dependent sales funnel plugin with 200,000+ active installations, built on custom DB tables, WordPress hooks architecture, and deep WooCommerce order lifecycle integration.

- Overhauled **CartFlows Flow Analytics**, expanding tracked KPIs from **8 to 24** (+200%) with new tabular data views, achieving **zero regression** and no performance degradation on a database-heavy implementation.
- Engineered a full-featured **interactive Canvas Builder** from scratch using **React and ReactFlow**, dynamically visualizing complete funnel flows and all nested steps in a node-based UI.
- Resolved **3 critical payment failures**, Stripe Express Checkout blocking transactions, PayPal infinite loading on upsell, and Google Pay misrouting to WooCommerce, cutting payment-related support tickets by **90%**.
- Conducted a comprehensive **security audit** of the CartFlows plugin and **independently remediated all identified vulnerabilities** spanning all **CVSS severity tiers**, from input sanitization and capability checks to privilege escalation and data exposure vectors.
- Pioneered **WordPress Abilities API** integration for CartFlows, mapping plugin capabilities as **MCP-compatible tools and resources** within the WordPress MCP server architecture.
- **Tech Stack:** *PHP, React.js, ReactFlow, JavaScript, MySQL, WordPress, WooCommerce, REST APIs, Git*

• Software Engineer, Hummingbird Web Solutions Pvt Ltd December 2023 - July 2025

- Built a high-performance **Windows application** automating JSON-to-PDF conversion using **C# and .NET**, delivering **20% faster internal workflows** with full CRUD persistence for **10+ designers**.
- Revamped **50+ React-based** Gutenberg block components, improving accessibility and UX for **4,000+ active users** across the **Responsive Blocks** plugin.
- Resolved critical security vulnerabilities in a SaaS platform, hardening reliability for **10,000+ active users** including **200+ premium subscribers**.
- Boosted **Core Web Vitals** score from **71 to 89** (+18 points) by targeting LCP and CLS via lazy loading, DOM optimizations, and layout fixes.

SKILLS

Core: Database Management, Technical SEO, System Design

Programming Languages: JavaScript (ES6+), PHP, TypeScript, C#, C++

Frameworks/Tech-Stack: React.js, Next.js, WordPress, Magento, jQuery, Webpack

Databases: MySQL, MS-SQL, MongoDB

Technologies: Linux, Git, GitHub, Docker, Redis, Nginx, Apache, REST APIs, GraphQL

PROJECTS

Edge Open Graph Image Engine | Live | GitHub

- **Tech Stack:** Next.js, Satori, WASM, Redis, Tailwind
- Architected a **WASM-based rendering pipeline** on Vercel Serverless, slashing image generation latency by **85% (from 2s to <300ms)** compared to resource-heavy headless browser solutions.
- Implemented **two-layer caching** (Global CDN + Upstash Redis) and an **Open Graph Image Inspector**, ensuring **0ms latency** for cached hits and verifying 100% crawler visibility for dynamic social metadata.

Real-time Webhook Platform | Live | GitHub

- **Tech Stack:** Next.js, React 19, MongoDB, Redis, SSE
- Engineered a scalable inspection suite using **Server-Sent Events (SSE)** for real-time request streaming, featuring unique endpoint generation and JSON replay capabilities for streamlined webhook debugging.
- Integrated **per-IP rate limiting** and automated **24-hour TTL cleanup** via Redis, maintaining a secure, zero-maintenance architecture capable of handling high-concurrency incoming traffic.

EDUCATION

• Bachelor of Technology in Computer Science and Engineering

Datta Meghe College of Engineering, Navi Mumbai

2019-23

CGPA: 8.4

OTHER ACTIVITIES

Reading, Trekking, Cricket, Anime
