EXPERIENCE

• Software Developer, Keyideas Infotech

June 2026 - Present

- Independently architected and shipped two production WordPress plugins, **Keyideas Connect for Xero (Live)** and **Keyideas Connect for Trello (Live)**, covering plugin architecture, PHP backend, **OAuth 2.0**, REST API integrations, React frontend, and security.
- Refactored **Next.js** and **MongoDB** apps before production launch - consolidating **16 tables to 9**, replacing plain-text store references with foreign key Object IDs, remediating **XSS vulnerabilities**, and implementing **RBAC**. Shopify app currently under review.
- Led delivery across multiple client projects as the primary technical contact, handling direct client communication through requirement gathering and progress reporting, mentoring **3 junior developers** on technical decisions and task prioritization, and reporting project status directly to the CEO.

• Software Developer, Brainstorm Force (CartFlows)

August 2025 - March 2026

- Extended CartFlows Flow Analytics from **8 to 24 tracked KPIs** on a WooCommerce plugin with 200,000+ active installations, building the backend data pipeline, tabular views, and charts end-to-end.
- Built a node-based Canvas Builder from scratch using **React** and **ReactFlow**, letting users visualise complete funnel flows and all nested steps in an interactive UI.
- Resolved 3 critical payment failures across Stripe Express Checkout, PayPal upsell flow, and Google Pay routing, cutting payment-related support tickets by **90%**.
- Audited the CartFlows codebase for security vulnerabilities and remediated issues across all severity levels, covering **input sanitization, capability checks, privilege escalation, and data exposure vectors**.
- Integrated the **WordPress Abilities API** into CartFlows, exposing plugin capabilities as **MCP-compatible** tools and resources within a WordPress MCP server.

• Software Engineer, Hummingbird Web Solutions Pvt Ltd

December 2023 - July 2025

- Reworked **50+ React-based** Gutenberg block components in the **Cyberchimps Responsive Blocks (Live Link)** plugin, improving accessibility and rendering consistency for **4,000+ active users**.
- Found and fixed critical security vulnerabilities on a SaaS platform serving **10,000+ active users** and **200+ paid subscribers**.
- Improved Core Web Vitals score from **71 to 89** by targeting LCP and CLS through lazy loading, DOM cleanup, and layout fixes.

SKILLS

Programming Languages: PHP, JavaScript (ES6+), TypeScript, C#

Frameworks: React.js, Next.js, WordPress, Node.js, PHPUnit, PHPCS, React Testing Library

Databases: MySQL, MS-SQL, MongoDB

Technologies: REST APIs, Git, Docker, Redis, Linux, GraphQL, Unit Testing

PROJECTS

Task Tracker | Live | GitHub

- **Tech Stack:** Next.js, Supabase, PostgreSQL, PWA
- Built a multi-user task manager with email auth, **row-level Postgres RLS** enforcing per-user data isolation at the database layer, approval-gated space sharing with transactional email notifications, and **database-backed brute-force rate limiting** that survives serverless cold starts.
- Implemented an **offline-first PWA** with a service worker stale-while-revalidate caching strategy, recurring tasks with **background job spawning**, cascading subtask completion with server-side state validation, and a global **command palette** with debounced server-side search.

Edge Open Graph Image Engine | Live | GitHub

- **Tech Stack:** Next.js, Satori, WASM, Redis, Tailwind
- Built a **WASM-based image generation pipeline** on Vercel Serverless, reducing latency by **85% (from 2s to under 300ms)** compared to headless browser alternatives.
- Implemented **two-layer caching** (Global CDN + Upstash Redis) and an **Open Graph Image Inspector**, achieving near-zero latency on cache hits and ensuring dynamic social metadata is crawler-visible.

EDUCATION

• Bachelor of Technology in Computer Science and Engineering

2019-23

Datta Meghe College of Engineering, Navi Mumbai

CGPA: 8.4
